Heat the purees at 40°C and pour gradually, stirring well, the mixture sugar/agar-agar. Bring to a boil and add the melted gelatin. Pour into a form of ø16cm. Freeze, unmold and cut into equal triangles. Reserve for decoration.

Assembly, layout and finishing

Assemble 2 layers of sponge with one layer of orange compote in the middle. Freeze.

Take the mold with the pressed shortbread inside, out of the freezer. Pour a very thin layer of chocolate mousse over and place directly the frozen chocolate/orange core on top pressing gently. Unmold and put back in the freezer for few minutes.

Pour the mousse into the silicon Eclipse mold (2 parts) halfway in. With an inox spatula press the mousse over the rounded edges, add some mousse back in the center and place the core over the mousse to fit perfectly at the top of the mold. Freeze.

Unmold and protect one half of the cake with a ruler and spray directly the white chocolate mixture over the other half. Reheat the dark chocolate glaze at 40°C, then mix using an immersion blender to homogenize and to get rid of as many air bubbles as possible. Glaze the other half of the cake. Decorate the cake with some piece of chocolate shortbread, the orange mango jelly triangles and the Dobla decoration : Orange 3D.

Enjoy this exciting recipe.
